⌖ PORTFOLIO

WORK EXPERIENCE

Backend Developer Trainee, FunctionUp
July 2022 – present

- Worked with Technologies like **NodeJs, ExpressJs, MongoDB**, **Git, and GitHub.**
- Completed **5+ major projects** using backend technologies.
- Solved **100+ problems** of DSA on **leetcode** .
- Skilled in **teamwork , owning tasks,** and timely deliveries.
- Demonstrated proficiency in these technologies and the ability to apply them to **real-world projects.**

TECHNICAL SKILL

- **Programming Languages: JavaScript, HTML, CSS.**
- **Back-end: Node.js, Express.js, Mongoose JWT, Joi, Bcrypt, Passport , Axios.**
- **Databases: MongoDB, MySQL, Redis, Firebase.**
- **Tools: Git, GitHub, Visual Studio Code, Postman, AWS.**

SOFT SKILLS

- Strong problem-solving skills and analytical thinking.
- Ability to work in a team environment and collaborate with cross-functional teams.
- Willingness to learn and adapt to new technologies and frameworks.
- Detail-oriented with a focus on delivering high-quality code

EDUCATION

High School(10th), Dayanand inter collage,shuklaganj
April 2015 – April 2016
marks 77%

Intermediate(12th),
Christ Church Inter Collage ,Kanpur
April 2017 – April 2018
marks 72%

Bacherlor Of ART,
Chhatrapati shahu ji maharaj univercity Kanpur
July 2018 – July 2021 | kanpur, India
marks 61.77%

PERSONAL PROJECTS

1) E-Commerce Shopping Cart, TechStack -Javascript , Node JS ,Express JS ,MongoDB ,AWS S3 🔗
January 2023

- Created a backend for an online store with multiple APIs for users, products, carts, and orders, **similar to Flipkart**. used **JWT for authentication** and permission for secured APIs, **Bcrypt** for password **encryption**, and **AWS S3** for picture storage

2) Book-Management, Tech Stack - Javascript, NodeJs, ExpressJs, MongoDB 🔗
January 2023

- Similar to Good Read , this project allows users to **register**, log in, **upload books**, update and delete those books, as well as provide **feedback and ratings** on any books.

3) URL Shortener, Tech Stack - Javascript, NodeJS, MongoDB, Redis 🔗
December 2022

- Created backend for URL shortening **services** like **TinyUrl**, and **Bitly** for easy sharing of **long URLs.** Used Redis as a Caching solution for quick response time.

4) Open-To-Interns, Tech Stack - Javascript, NodeJs, ExpressJs, MongoDB 🔗
December 2022

- In this project, we **create APIs** that allow employers to select interns based on the name of the college. the logo was saved on **Amazon S3** , and we also used Cors to connect it to the **frontend**.

5) Bloggers-Castle, Tech Stack -Javascript, NodeJs, ExpressJs, MongoDB 🔗
December 2022

- Built a blog website **CRUD operations** were carried out on blogs using multiple user and blog APIs in the backend. protected APIs using **JWT** for **authentication and authorization**, Similar to Bloggers.com.

6) Map -Memories, Tech Stack -Javascript, NodeJs, ExpressJs, MongoDB, React JS, HTML,CSS 🔗
March 2023

- Create our memories in **Google MAP** and **upload images and delete** memories, all APIs are protected using JWT for authentication and authorization, this is a unique project **deployedLINK** 🔗
